

BIL 101 INTRODUCTION TO COMPUTER SCIENCE

HW #05

Due Date: 19/10/2017 - 09:00

In this assignment you will design an algorithm of the montage of a worktable. The following figure illustrates the steps to montage the furniture properly. You are supposed to write a corresponding algorithm.

1. Determine the primitives (building blocks, the syntax) of your algorithm
2. Create a table representing what the primitives you defined corresponds to (the semantics of your primitives)
3. Using the primitives write the algorithm step by step.

Create a PDF file of your work and upload on moodle in the following form:

<std_number>.pdf

Please ask your questions via asturan@gtu.edu.tr and do not send messages through moodle.
